Seeing the Unseen: CBCT in Endodontics

Course highlights:

The implementation of imaging methods that enable sensitive and specific observation of anatomical structures has been a constant in the evolution of endodontic therapy. Cone-beam computed tomography (CBCT) enables 3-dimensional (3D) spatial anatomical navigation in the 3 volumetric planes (sagittal, coronal and axial) which translates into great accuracy for the identification of endodontic pathologies/conditions.

- Basics of CBCT
- Concepts of 2D &3D imaging
- CBCT in Endodontics
- How to read CBCT scan
- Hands on live software demonstration
- Case based discussion

Course Mentor:

Dr. Isha Sabhlok

India

Venue: Goa Dental College & Hospital

Timing of the course: 9.00 am to 3.00 pm

Date of course: 31/10/2025

Course fees: Rs. 2000/-

Supported by:
