33RD IESCON 2025

National Conference of Indian Endodontic Society

31st October to 2nd November 2025 Kala Academy, Campal, Panjim, Goa.

Shaping under control and Ledge management using the new E-Style rotary files: make it feasible, teachable and repeatable!!!!

Course highlights:

The creation of a ledge during the shaping is the most common iatrogenic damage to the endodontic anatomy and it can be created by manual and rotary files. Once created, its management is crucial to complete the shaping the cleaning and the obturation at the proper working length to not decrease the outcome of the treatment.

This workshop will introduce the participants to the new E-Style rotary files focusing attention on the proper use of the rotary files and on ledge management, showing tips to ease the re-negotiation of the canal up to the working length. The workshop will also focus on tips that ease the obturation using the Warm Vertical compaction or the cold hydraulic condensation with abioceramic sealer.

Course Benefits for participants:

- Understanding rotary files to shape under control the root canal system preventing iatrogenic damages
- Ledge management using manual and rotary files
- Tips to get a 3D obturation of the root canal system using the Warm Vertical Compaction
- How to properly use the bioceramic sealer using the cold hydraulic condensation

Course Mentor:

Dr. Filippo Cardinali

Italy

Venue: Goa Dental College & Hospital

Timing of the course: 9.00 am to 4.00 pm

Date of course: 31/10/2025

Course fees: Rs. 3000/-
